

EXCERPT FROM THE REFERENCE LIST – "SENA" KRAGUJEVAC

SENA is a manufacturing, trading and servicing company, whose main activity is production of refrigeration systems, components of refrigeration systems and cold rooms. Company was founded in 1999. Owner and a general manager is Dragan Senić MScEE graduate engineer of electrical and computing.

With appropriate qualified structure of employees and managers, SENNA represents a modern, medium-size company which is very flexible and dynamic and which can respond on each customer's or market's request.

Our production programme includes:

- **Cold storage rooms** - sizes and capacities according to the requests of investors;
- **Thermoinsulated doors – all size** hinged, sliding and industrial sectional doors, with or without automation;
- **Condensing units and cooling systems** - for all temperature applications, designed and mounted according to the requirements of investors;
- **Deep freezing rooms** - miscellaneous freezing capacity, for all types of goods, with optimized air flowing for maximal effective freezing;
- **Cooling systems for indirect cooling "Chillers"** - circulating cooling fluid for different technological processes;
- **Cold rooms with controlled atmosphere "ULO"** - cold rooms for high quality and long term storage of fruits and vegetables with fine regulation of temperature, humidity, and the percentage of the gases inside.

All "**Sena**" products are based on the environment-friendly refrigerants in accordance with the highest European standards.

Our references are thousands of produced and mounted cooling systems in Serbia and surround.

Our largest customers are producers of meat, milk, fruits and vegetables, eggs, trading companies, catering facilities, pharmaceutical industry, plastic processing industry and many other industries where cooling is necessary.

Since its establishment, **SENA** is in a permanent rise and development. Management and the entire organization are dedicated to the quality, what made **SENA** one of the regional leaders in the field of cooling technology. We are "listening" our customers and we do respect their opinion. The permanent contact with them is one of the most valuable segments of our strategy.
